Solving problem existed with the existence of humans, even before having technologies. How did we used to solve problems without the digital tools we have now? Create a brief video documentary that talks about problem solving in the past and now. Did technology help us solve more problems? Did it create new problems that we are not aware of? How would we solve.

Your video should be 10-20 minutes length. And talks about problem solving tools in the digital information age, and how we used to solve problems without it.

You might include images, and parts of other videos in it Just include your references.

Upload your video to YouTube and share the link to the URL in the dropbox by the due date/time.
