CECS100

Loop Lab
Extra Credit

Write a while loop that will output the even numbers between 100 and 80 -included- in descending order.

Rewrite the same loop using a for loop and the range function

Rewrite the same loop using a for loop and a list (print the even numbers 100-90) only for this one

You may separate your codes with some print statements to separate each part

Draw the flowchart and the tree diagram for the loop

Document your code

Make sure that you copy and paste your code, output in your document and upload the pdf. format
