Hmw2

Part I:
Page 24 review questions:
Multiple choice, True / false and the short answers.
Part II:
Draw the flowchart, top down design (tree diagram) and write the python code to convert
Celsius temperatures to Fahrenheit temperatures.
The formula is as follows: F = 9 5 C + 32 F = 95 C + 32
The program should ask the user to enter a temperature in Celsius, then display the
temperature converted to Fahrenheit.

Type your answers, paste your code, charts and multiple sample outputs to your document and
upload as a pdf.
